

## About the Study

### Purpose

To learn more about people that have health issues caused by cystic fibrosis-related diabetes (CFRD). These health issues are related to the heart, eyes, nerves, and kidneys.

### Design

There are no drugs or treatments for this study. Many of the study procedures are routine care recommended for CF and CFRD. Information will be collected from questionnaires and by wearing different medical devices.

### Requirements

- Have had CFRD for at least 5 years
- 12 years of age or older
- Cannot be pregnant or have had a transplant

**You will still get your usual care and treatment for CF and CFRD if you choose not to join the study**
